

# Pearson

Lecturers can see students' scores related to the **time they spend on tests**, inferring engagement levels and effectiveness.

Lecturers can see detailed **breakdowns of students' scores**, identifying where scores can be improved and where best practice can be shared.

## MyLabs and Mastering improves student results

**MasteringEngineering**

**7%**  
**14%**

“ There was an increase of 7% in the average mark in the first semester Mastering was used, and 14% in the second semester, compared to the previous year. ”

University of Hull

**MasteringBiology**

“ The coursework component mark increased from last year by nearly 10%. ”

University of Essex

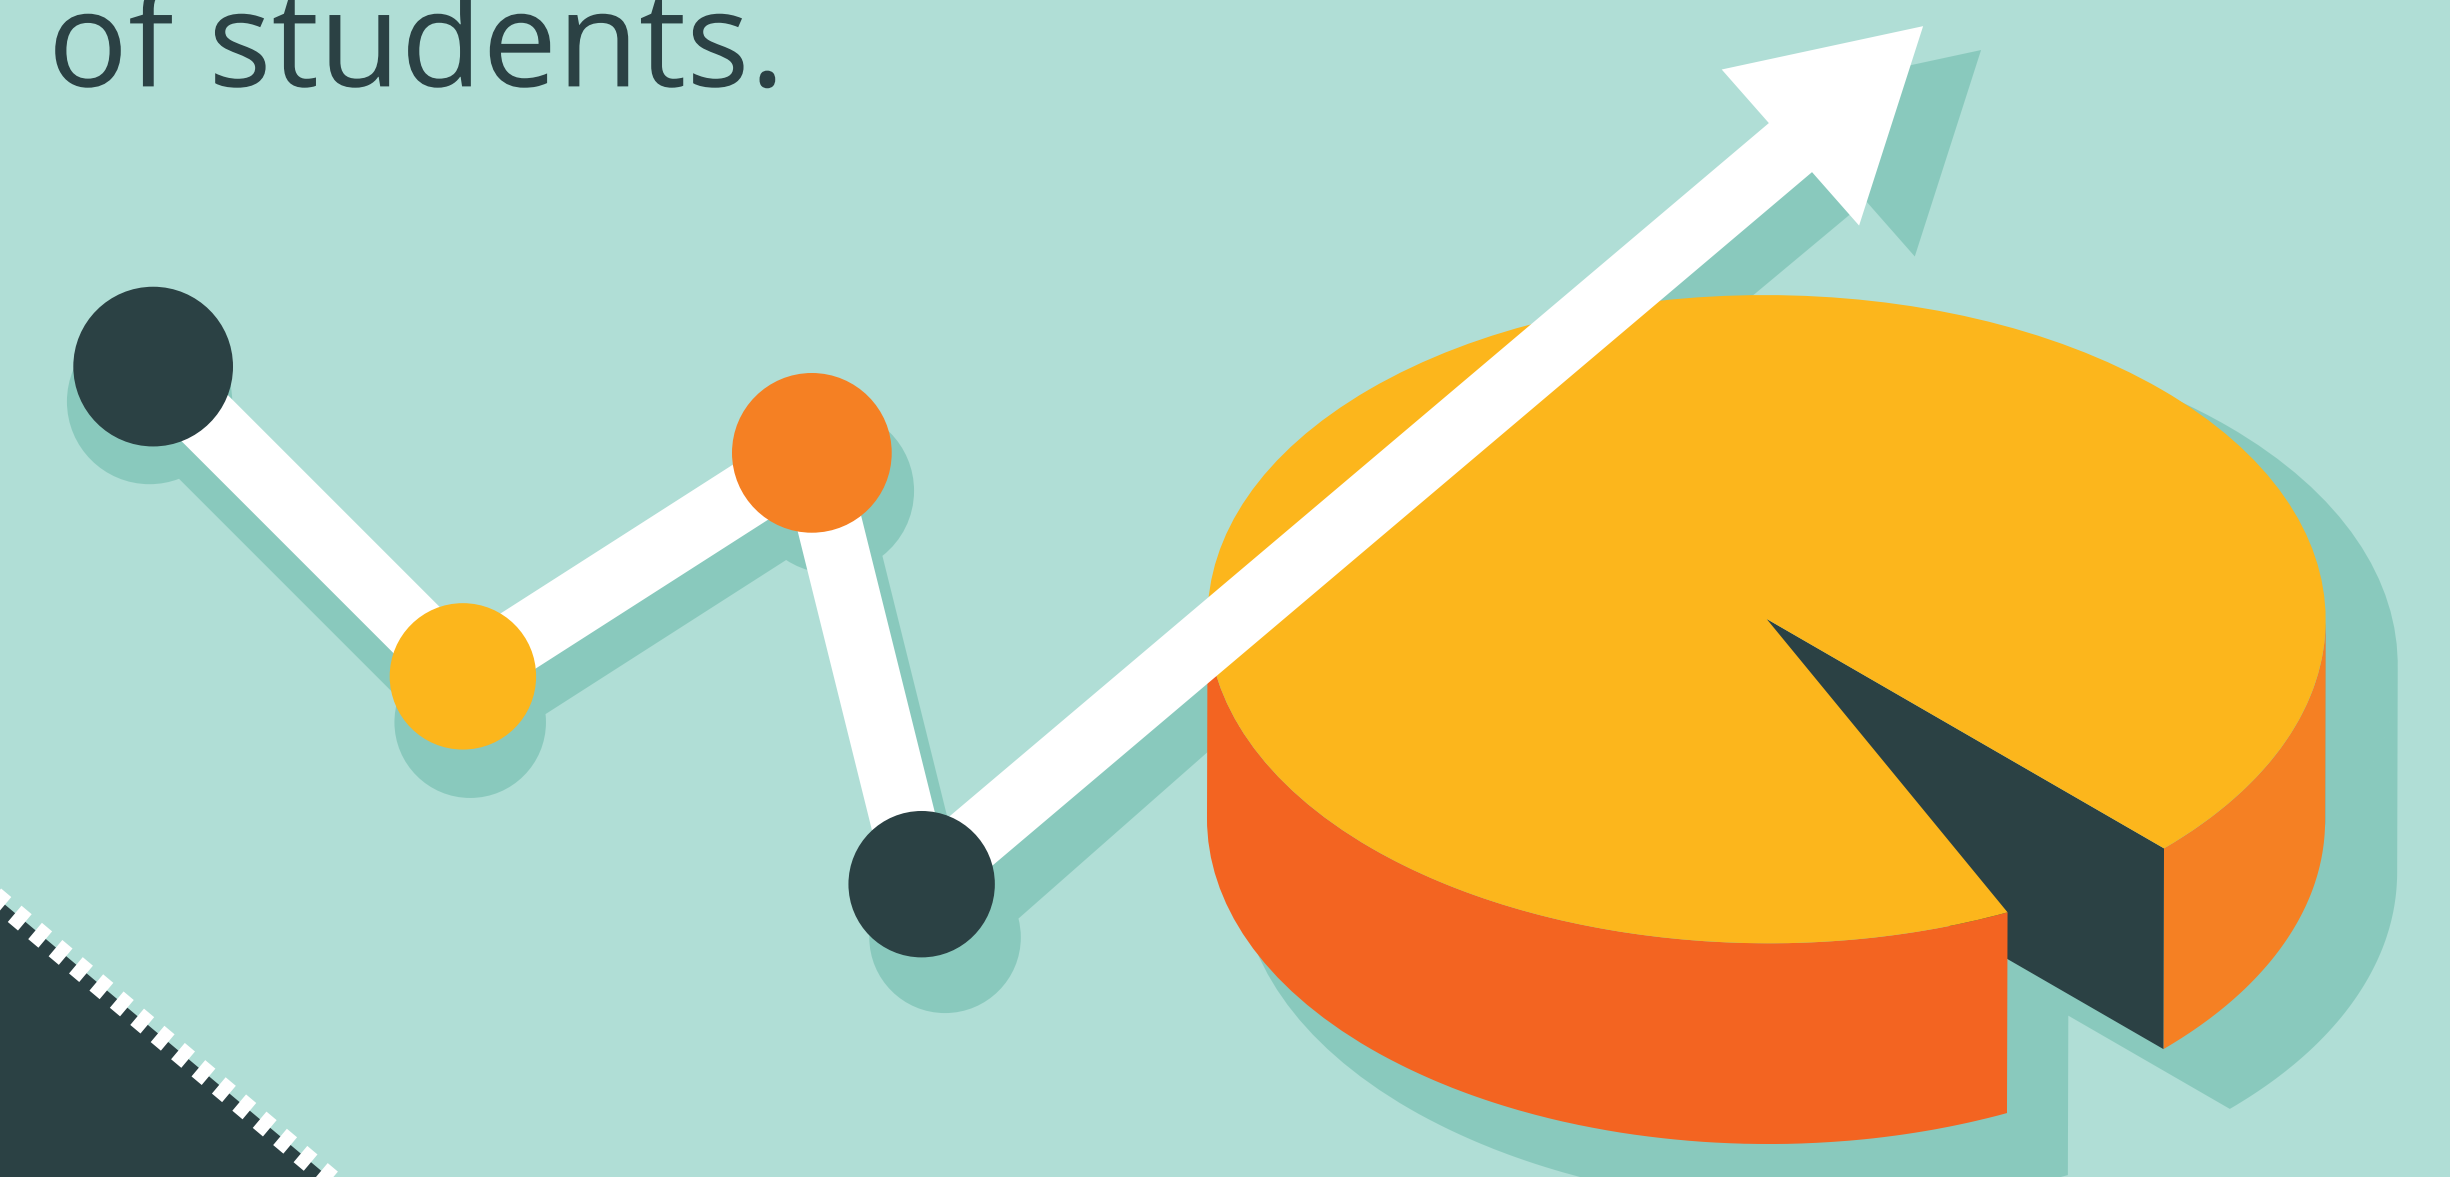

**10%**

**MyAccountingLab**

“ I think students get a better understanding of the subject through using MyAccountingLab. ”

University of East Anglia

We can provide learning analytics for all of our digital resources which can help **improve performance and engagement levels** of students.
